

Abdallah Ali Rehab

Senior Mobile Engineer (Flutter)

 NasrCity, Cairo  abdorehab95@gmail.com  01210730799 - 01559292997  Abdallah Ali Rehab

 Abdallah Rehab

Results-driven Senior Mobile Engineer with 6+ years of experience delivering and optimizing large-scale Flutter applications for Android & iOS, serving millions of active users. Proven expertise in leading full-cycle development from architecture design to production deployment, modernizing legacy codebases, and driving measurable improvements in performance, app size, build times, and security. Successfully led initiatives achieving up to 60% performance gains, improving scalability and maintainability while strengthening security compliance. Strong background in modular architecture, CI/CD automation, and cross-team collaboration. Early adopter of AI-augmented development workflows to accelerate delivery, improve code quality, and enhance engineering productivity, with a consistent focus on building scalable, enterprise-grade mobile solutions using modern engineering practices.

WORK EXPERIENCE

Senior Mobile Engineer, MEGAMIND IT Solutions  Nov 2025 – Present | Cairo

- Led Flutter development for a **large-scale healthcare mobile application** serving a high volume of active users across Android & iOS.
- Architected, refactored, and modularized a legacy codebase to reduce technical debt and significantly improve maintainability and scalability.
- Implemented **CI/CD pipelines and automated testing standards**, accelerating release cycles and improving deployment reliability.
- Improved overall application performance by **~40%**, including faster app startup times, smoother navigation, and optimized runtime behavior.
- Strengthened application security by applying **healthcare-grade security best practices**, including secure data storage, encrypted communication, and hardened authentication flows.
- Collaborated closely with **product, backend, QA, and DevOps teams** to deliver complex features on time while maintaining high code quality and stability.

Senior Mobile Developer, WalaPlus  Dec 2022 – Oct 2025 | Riyadh, KSA

- WalaPlus is your first source for creating loyalty and happiness programs for your employees and customers.
- Developed and maintained WalaOne, WalaPlus, and Doam apps, serving millions of active users, reaching +3M in loyalty and rewards programs with 4.5+ app store ratings.
 - Initiated and led the development of Doam from scratch, including architecture design, CI/CD pipelines, and coding standards, serving more than 1.2 million users.
 - Enhanced app performance via caching, API optimization, and code refactoring, achieving up to 60% faster load times.
 - Implemented unit testing (Mocktail), achieving up to 90% code coverage and reducing bug reports by 70%.
 - Introduced modular architecture to reduce coupling and improve maintainability.
 - Strengthened app security with a comprehensive threat model protecting against reverse engineering, runtime injections, and MiM attacks.

Flutter Developer, WEDDNGO  Dec 2020 – Dec 2022 | NasrCity, Cairo

- Contributed to Egypt's largest wedding marketplace app, connecting users with service providers.
- Helped secure funding through Shark Tank Egypt by delivering high-quality features and performance improvements.
- Integrated new features including vendor subscriptions, booking systems, and in-app payments.
- Optimized app performance, improving load times and responsiveness.

PROJECTS

Saudi German Health (SGH), Healthcare Mobile App

- Contributed to a large-scale healthcare mobile application for a leading hospital group.
- Focused on stability, scalability, and reliable delivery in a production healthcare environment.
- Worked closely with cross-functional teams to support continuous feature delivery.

Google Play  APP Store 

WalaOne 

- Loyalty & Rewards App Revamped app performance, achieving 60% faster load time; implemented caching, modular architecture, and unit testing (90% coverage).

Google Play  App Store 

Doam - دؤم, (walaplus)

- Public Sector Rewards Platform Developed for public sector employees in partnership with the Ministry of Human Resources, serving 1.2M+ users.
- Initiated and led the development from scratch, designing the architecture, setting up CI/CD pipelines, and defining coding standards to ensure scalability and maintainability.

Google Play  . App Store 

WalaPlus

- Loyalty & Rewards App Enhanced performance by implementing caching and API optimizations, achieving 40% faster load times. Implemented unit testing (Mocktail) with 60% coverage, reducing bug reports by 50%, and applied modular architecture and advanced security measures to improve maintainability and protect against reverse engineering and MiM attacks.

WEDDnGO (User && Seller)

- Wedding Marketplace: Egypt's largest wedding marketplace; delivered booking and vendor management features; featured on Shark Tank Egypt.

Google Play [↗](#)

App Store [↗](#)

Seller - App Store [↗](#)

PDentalCore, Freelancer project

- Designed and developed a specialized app for dental professionals to manage appointments, patient records, X-rays, medications, surgeries, and notes, while also tracking revenues and expenses for efficient practice management

SKILLS

Mobile Development: Proficient in Flutter framework for cross-platform app development. | Expert in writing clean, maintainable, and scalable code in Flutter, Dart, Java, Kotlin and Swift | Strong knowledge of Flutter widgets (Stateless, Stateful, Custom Widgets). | Skilled in state management using Bloc, Provider, Riverpod, or GetX. | Experience with adaptive and responsive layouts for various screen sizes and platforms. | Writing unit tests, widget tests, and integration tests to ensure quality. | Implementing offline-first apps with caching strategies. | Managing app lifecycle and state restoration. | Writing platform-specific code using Platform Channels for native functionality. | Handling background services and push notifications effectively and Experience working with map technologies and tools.

UI/UX Design: Creating pixel-perfect, responsive UIs from Figma/Adobe XD designs. | Expertise in Material Design and Cupertino Design principles. | Proficient in creating smooth animations and transitions to enhance user experience. | Skilled in integrating custom themes, typography, and styling for branding.

Backend Integration: Experience with consuming RESTful APIs and handling GraphQL. | Knowledge of authentication mechanisms (OAuth, JWT, Firebase Auth). | Skilled in local storage solutions like Hive, SQLite, ObjectBox, and Shared Preferences.

Third-Party Integrations: Integration with payment gateways (Braintree, Paymob, Stripe, PayPal). | Integration with CleverTap, Sentry, Intercom, Smartlook and Kebana | Implementing push notifications using Firebase Messaging or OneSignal. | Proficiency in integrating location services and Google Maps APIs. | Analytics integration with Firebase Analytics, Google Analytics and AppDynamic

Performance Optimization: Profiling and optimizing app performance to improve responsiveness. | Expertise in handling asynchronous programming with Dart's async and await. | Using Isolates and background processing for heavy tasks. | Reducing widget rebuilds by optimizing build methods.

Deployment and App Store Management: Skilled in publishing apps on Google Play Store and Apple App Store. | Managing code signing, provisioning profiles, and certificates for deployment. | Configuring CI/CD pipelines using GitHub Actions, Bitrise, or Codemagic.

Tools & Workflow: Expertise with version control systems like Git and platforms like GitHub, GitLab, and Bitbucket. | Skilled in using IDEs such as Android Studio, VS Code, and Xcode. | Familiarity with Agile development workflows, including Scrum methodologies. | Experience using AI tools to enhance code performance, improve quality, and boost productivity.

AI-Driven Development & Engineering Productivity: Leveraging AI-assisted development tools to accelerate coding, debugging, and refactoring while maintaining high code quality and scalability. | Using AI for architecture brainstorming, performance optimization strategies, and technical decision support. | Automating repetitive development tasks such as boilerplate generation, documentation drafting, and test case creation. | Applying AI tools to analyze crash reports, logs, and performance bottlenecks to speed up issue resolution. | Enhancing productivity by combining AI assistance with clean architecture principles and manual code review discipline.

EDUCATION

Bachelor,

Computer Science Faculty of computers and Information, Menoufiya University
GPA 3.2

2016 – 2020
