

ABDALLAH ALI REHAB

Senior Mobile Engineer | Flutter — Android & iOS

Nasr City, Cairo, Egypt | abdorehab95@gmail.com | +20 121 073 0799 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 6+ years of experience building, modernizing, and scaling production Flutter applications for Android and iOS, including apps serving 7M+ combined active users in loyalty, rewards, and healthcare domains. Proven track record leading full-cycle mobile development — from architecture and CI/CD setup through release — including taking a public-sector rewards app from zero to 1.2M+ users. Delivered up to 60% faster load times and up to 90% automated test coverage while hardening applications against reverse engineering and MITM attacks. Experienced modernizing legacy codebases in regulated, production healthcare environments, with a consistent focus on modular architecture, performance engineering, and cross-functional delivery. Early adopter of AI-assisted engineering workflows to accelerate development and improve code quality.

CORE TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Java, Kotlin, Swift; Stateless/Stateful/Custom widgets; adaptive & responsive layouts; Platform Channels; app lifecycle & state restoration; offline-first apps & caching strategies

Architecture & State Management: Modular Architecture, Clean Architecture principles, BLoC, Provider, Riverpod, GetX, Dependency Injection

Backend & API Integration: RESTful APIs, GraphQL, OAuth, JWT, Firebase Auth, Hive, SQLite, ObjectBox, Shared Preferences

Third-Party Integrations: Braintree, Paymob, Stripe, PayPal; CleverTap, Sentry, Intercom, Smartlook, Kibana; Firebase Cloud Messaging, OneSignal; Google Maps APIs

Testing & Quality: Unit, widget & integration testing; Mocktail; up to 90% test coverage achieved

Performance & Optimization: Profiling, async/await, Isolates & background processing, caching, build-method & widget-rebuild optimization

Security: Secure storage, encrypted communication, threat modeling, reverse-engineering & MITM protection, hardened authentication flows

CI/CD & Release Engineering: GitHub Actions, Bitrise, Codemagic; code signing & provisioning profiles; Google Play Store & Apple App Store publishing

Analytics & Monitoring: Firebase Analytics, Google Analytics, AppDynamics

Tools & Workflow: Git, GitHub, GitLab, Bitbucket, Android Studio, VS Code, Xcode; Agile/Scrum

AI-Assisted Engineering: AI-assisted coding, debugging & refactoring; AI-supported architecture and performance decisions; automated boilerplate/doc/test generation; AI-assisted crash & log analysis

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer, MEGAMIND IT Solutions Nov 2025 – Present | Cairo, Egypt

- Lead Flutter development for Saudi German Health (SGH), a patient self-service healthcare app for a leading hospital group, live on Android and iOS with 3.5M+ combined users in a production clinical environment.
- Architected and modularized SGH's legacy codebase, reducing technical debt and materially improving maintainability and scalability.
- Implemented CI/CD pipelines and automated testing standards, accelerating release cycles and improving deployment reliability.
- Improved application performance by ~40% through faster app startup, smoother navigation, and optimized runtime behavior.
- Strengthened application security to healthcare-grade standards — secure data storage, encrypted communication, and hardened authentication flows.
- Partner with product, backend, QA, and DevOps teams to deliver complex features on schedule while maintaining code quality and stability.

Senior Mobile Developer, WalaPlus Dec 2022 – Oct 2025 | Riyadh, Saudi Arabia

- Developed and maintained three production Flutter apps — WalaOne, WalaPlus, and Doam — collectively serving 7M+ active users across loyalty and rewards programs, with 4.5+ app store ratings.

- Initiated and led development of Doam from the ground up — architecture design, CI/CD pipelines, and coding standards — scaling it to 1.2M+ users in partnership with a public-sector rewards initiative.
- Improved WalaOne performance via caching, API optimization, and refactoring, achieving up to 60% faster load times and up to 90% unit test coverage (Mocktail), reducing bug reports by up to 70%.
- Improved the core WalaPlus app's performance through the same techniques, achieving up to 40% faster load times, 60% test coverage, and a 50% reduction in bug reports.
- Introduced modular architecture across the app portfolio to reduce coupling and improve long-term maintainability.
- Designed and implemented a threat model hardening apps against reverse engineering, runtime injection, and man-in-the-middle attacks.

Flutter Developer, WEDDNGO *Dec 2020 – Dec 2022 | Nasr City, Cairo*

- Built core features for Egypt's largest wedding marketplace app, connecting couples with vendors across user and seller apps.
- Contributed high-quality feature delivery and performance improvements that helped the company secure funding through Shark Tank Egypt.
- Integrated vendor subscription management, a booking system, and in-app payments.
- Improved app performance, reducing load times and improving responsiveness.

SELECTED PROJECTS

Saudi German Health (SGH) — Healthcare Mobile App | MEGAMIND IT Solutions

- Flagship project of my current Senior Mobile Engineer role — a patient self-service app for a leading hospital group, live on Android and iOS with 3.5M+ combined users (1M+ Android downloads on Google Play; 2.5M+ iOS users).
- Modernized the legacy codebase and hardened security for a production healthcare environment; full scope covered under Professional Experience above.

[Google Play](#) | [App Store](#)

Doam (دوام) — Public Sector Rewards Platform | WalaPlus

- Rewards platform built for public sector employees in partnership with Saudi Arabia's Ministry of Human Resources, scaled from launch to 1.2M+ users.
- Initiated and led development from scratch — designed the architecture, set up CI/CD pipelines, and defined coding standards to ensure scalability and maintainability.

[Google Play](#) | [App Store](#)

WalaOne — Loyalty & Rewards App | WalaPlus

- Loyalty and rewards app within the WalaPlus portfolio, serving 3M+ active users with 4.5+ app store ratings.
- Revamped app performance through caching and modular architecture, achieving up to 60% faster load times and up to 90% unit test coverage.

[Google Play](#) | [App Store](#)

WalaPlus — Core Loyalty Platform | WalaPlus

- Flagship loyalty and rewards application for WalaPlus, serving 4M+ active users across the company's loyalty programs.
- Improved performance and reliability via caching and API optimization (40% faster load times), unit testing (60% coverage), and a threat model protecting against reverse engineering and MITM attacks.

EDUCATION

Bachelor of Science, Computer Science — Faculty of Computers and Information, Menoufia University

2016 – 2020 | GPA: 3.2 / 4.0
